RE: Town of Rolling Hills Mailbox Facility – Warranty Walkthrough

Mr. Lacey:

A warranty walkthrough of the Town of Rolling Hills Mailbox Facility Project was conducted on August 31, 2023. The walkthrough included the entire project area. All site civil work warranty punchlist items are incorporated in this letter. The following items were identified for correction or completion prior to release of the warranty:

Punch List Items

- Route and seal cracks in sidewalk adjacent to downspouts along front entrance of the mailbox facility.
- Remove and replace misshapen, approximately 3 ft in length, section of curb and gutter along the northerly most approach, west of the curve tangent point.
- Remove vertical curb in northeasterly landscape area as the Town will look to have this area hard surfaced.

These items shall be satisfactorily corrected before release of the warranty. Please notify WLC when these items have been addressed.

Respectfully,

A handwritten signature in blue ink, appearing to read 'Brad Holwegner', is written over a light blue circular background.
